- Training services for different DW & BI Tools
- Vendor Evaluation for DW & BI Tools for clients
- Asset and Resource Optimization

FLEXIBLE SOLUTIONS FOR YOUR DATA WAREHOUSING & BUSINESS INTELLIGENCE NEEDS

DATA WAREHOUSING / BUSINESS INTELLIGENCE & PERFORMANCE MANAGEMENT (DW/BIPM) PRACTICE

GCE's BIPM practice has a holistic view of Business Intelligence and Performance Management. GCE believes that 'Enterprise Intelligence' will drive business outcomes if powered by process integration and business innovation. On a similar note, setting targets and meeting those targets on a consistent basis requires a complete alignment of processes, performance and prediction.

GCE DW/BIPM VALUE DIFFERENTIATORS

GCE's BIPM practice enables organizations in making fast, reliable business decisions based on accurate & usable information by using GCE's pre-build practices & architectures. It also enables organizations in saving via data mart consolidation and using a common Enterprise Business Intelligence / Enterprise Data Warehousing (EBI / EDW) infrastructure.

GCE's DW/BIPM practice promises to achieve the business goals and continuity with its fast paced implementation approach to manage data across geographies for small to large organizations with clients in different industries. It also ensures that organizations follow the defined standards, policies and methodologies.

THOUGHT LEADERSHIP @ GCE SOLUTIONS

DW / BI CENTER OF EXCELLENCE (COE)

GCE understands that data warehouse is a place of Clean, Integrated and Consistent source of Business Information. The physical implementation of a Data Warehouse Architecture requires different types of tools and technologies, viz. Data-bases, Data modeling, Profiling, ETL, Data Cleansing, Meta Data Management and front end tools, depending on purpose and requirements.

These days a terabyte is not a lot of data anymore, as data warehouses range upto hundreds of terabytes. Companies are realizing the value of this data, and need to quickly and easily analyze it to gain the insight necessary to leverage customer interactions, optimize business processes and generate competitive advantage.

We have variety a of Solutions and Strategic consulting services for Architecture, Design, Implementation, Support and Maintenance in Data Warehousing and Business Intelligence areas. GCE's Tool-set focus for this area:
